April 7, 2020

FOR IMMEDIATE RELEASE

The Randolph County Public Health Department (RCPH) is reporting the second COVID-19 associated death in Randolph County.

The individual died on Saturday, April 4, 2020, and was confirmed positive for COVID-19 on Tuesday, April 7, 2020. The patient was in their 80's and had underlying medical conditions. To protect the privacy of the family, no further information about this patient will be released.

The seriousness that surrounds COVID-19 and the potential impacts to high-risk individuals is very real. The North Carolina Department of Health and Human Services (NCDHHS) recommends that **everyone stay at home to the extent possible to decrease the chance of infection**. This is of particular importance to prevent the spread to high-risk individuals.

The Centers for Disease Control and Prevention (CDC) includes the following people as high or higher risk:

- High-risk for severe illness from COVID-19:
 - People aged 65 years and older
 - People who live in a nursing home or long-term care facility
- Higher-risk for severe illness from COVID-19:
 - People of all ages with underlying medical conditions, particularly if the underlying medical conditions are not well controlled. This includes people with:
 - Chronic lung disease or moderate to severe asthma
 - Serious heart conditions
 - Conditions that can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplant, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications
 - Severe obesity (body mass index [BMI] of 40 or higher)
 - Diabetes
 - Chronic kidney disease undergoing dialysis
 - Liver disease
- People who are pregnant should be monitored since they are known to be at risk with severe viral illness, however, to date, data on COVID-19 has not shown increased risk

Because COVID-19 is most commonly spread through respiratory droplets, individuals should take the same measures that health care providers recommend to prevent the spread of the flu and other viruses, including washing your hands, avoiding touching your face, staying home if you are sick and covering coughs and sneezes with your elbow. In addition to physical distancing (6' between people), CDC now recommends that everyone wear a cloth face covering when out in a public setting, especially in places that physical distancing is hard to maintain (grocery

store, pharmacy, etc.). For more information on cloth face coverings, please see this FAQ:
<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cloth-face-cover-faq.html>

It is important to make sure the information you are getting about COVID-19 is coming from reliable sources like the Randolph County Public Health Department, CDC, and NCDHHS. For more information, please visit the RCPH's website at <http://www.randolphcountync.gov/Departments/Public-Health/COVID-19>, the CDC's website at www.cdc.gov/coronavirus and NCDHHS' website at www.ncdhhs.gov/coronavirus, which also includes positive COVID-19 case count results in North Carolina.

Symptoms for COVID-19 are fever, cough, and other lower respiratory illness (shortness of breath). If you are having a mild respiratory illness, isolate yourself from others until the following criteria are met:

- At least 7 days have passed *since symptoms first appeared*.
- **AND** at least 3 days (72 hours) have passed *since recovery* defined as resolution of fever without the use of fever-reducing medications **and** improvement in respiratory symptoms (e.g., cough, shortness of breath).

If your illness becomes severe, requiring urgent or emergent health care, call and inform your health care provider or emergency services of your symptoms prior to arrival.

If you have questions, you may call the Randolph County Coronavirus Hotline at: 336-318-6227, Monday-Friday, 8AM-5PM.
